SUMMARY

Passionate and experienced Software Engineer with a decade of expertise in creating high-quality, high-performance web and native products. Passionate about clear communication, great design, and delivering seamless UX. Skilled in modern technologies like React, React Native, TypeScript, and GraphQL, with a strong track record in leading projects and mentoring teams.

EXPERIENCE

Staff Software Engineer @ Varo Bank

January 2020 - Present

- Currently helping with a complete rewrite of the Varo Bank app using React Native with Expo and TypeScript.
- Previously worked across multiple projects and cross-functional teams, often at once.
- Lead the Web effort in building and advocating for our new Design System.
- Integrated with 3rd party services such as Statsig as our new feature and experiment platform and Column Tax for tax prep purposes.
- Lead the Web efforts and promoted server-driven UI architectural pattern.
- Played a pivotal role in hiring, mentoring and onboarding new engineers.
- Initially joined as a Senior Frontend Engineer and promoted to Staff Engineer in March 2024.
- **Some technologies I am working with:** TypeScript, React, React Native, GraphQL, Node.js, Storybook, Figma and React Testing Library.

Sr. Frontend Developer @ Overstock.com

October 2019 - December 2019

- This was my brief second stint at Overstock.
- Fixed bugs and built features on the product details page.
- **Some technologies I worked with:** Node.js, Express, Webpack, Redux and React.

Sr. Full-Stack Developer @ tZERO

September 2018 - October 2019

- Built a securities trading platform greenfield project on the blockchain.
- Focused on Onboarding and KYC portion of the Web application, worked across the stack, from UI to database.
- Filled in for multiple temporary Dev Lead stints.
- **Some technologies I worked with:** React, Redux, Node.js, Express, PostgreSQL, Jest and Webpack.

Frontend Developer @ Overstock.com

October 2014 - September 2018

- Handled new feature implementation, A/B Tests, and bug squishing on product pages.
- Worked on a full-stack mobile web app as well as various client-side apps.
- Was involved in the design process of product with UX and Product teammates.
- Built tools for our front-end workflow, such as implementing ES6 support and ReactJS into our repo.
- Created reusable React components and NPM modules that were used by teams across Overstock.com.
- During this time I was promoted to Senior Frontend Developer. Some previous teams I worked with: Marketing and Production web team.
- **Some technologies I worked with:** jQuery, Node.js, Express, Webpack, Redux and React.

Freelance Developer and Designer @ Damir Hara Design

March 2013 - ∞

- Helped companies/clients build websites and web apps from scratch or by jumping in the middle of the project. I've worked on everything from simple one-page static websites to production React apps served to millions of customers.

Clients worked with: Infowrap.com, Cottonwood Electric, TheChapelMotorcycleShop.com.
