SUMMARY

Passionate and experienced Web Software Engineer who values clear communication, great design and creating pixel-perfect, high-performance web interactions.

EXPERIENCE

Sr. Frontend Engineer @ Varo Bank

January 2020 - Present

- Currently leading the Web Engineering effort on our new Design System and helping with migration.
- Helped develop and launch the new bank.varomoney.com.
- Part of a hiring committee and helped mentor new Engineers.
- Worked across multiple projects and teams including: client banking, growth, engagement, internal tools and design systems.
- Some Technologies I am working with: TypeScript, React, GraphQL/Apollo, Storybook, and React Testing Library.

Sr. Frontend Developer @ Overstock.com

October 2019 - December 2019

- Built the Product Page in Node.js, Express, Webpack, Redux, and React.
- Rebuilt the Webpack Server-side Rendering portion of our NodeJS powered app.
- This was my brief second stint at Overstock.

Sr. Frontend/Full-Stack Developer @ tZERO

September 2018 - October 2019

- Built the next generation Blockchain-based UI using React, Redux, Webpack, Express, and Node.js.
- Filled in for multiple temporary Dev Lead stints.

Frontend Developer @ Overstock.com

October 2014 - September 2018

Product Page Dev Team:

- Handled new feature implementation, A/B Tests, and bug squishing on product pages.
- Worked on a full-stack Node.js, Express, React, Redux mobile web app as well as various client-side repo's.
- Was involved in the design process of product with UX and Product teammates.
- Built tools for our front-end workflow, such as implementing ES6 support and ReactJS into our repo.
- Created reusable React components and NPM modules that are used by teams across Overstock.com.
- During this time I was promoted to Senior Frontend Developer.

Production Web Team:

- Worked directly with Marketing, Product, and Back-end teams on various projects concerning the homepage of Overstock.com.
- Handle initial front-end development, support and maintenance for Overstock.com micro-sites, homepage content, and promotional email/content/pages. Take part in QA and on-call when needed.

Freelance Developer and Designer @ Damir Hara Design

March 2013 - ∞

- Helped companies/clients build websites and web apps from scratch or by jumping in the middle of the project. I've worked on everything from simple one-page static websites to production React apps served to millions of people.

Clients worked with: Infowrap.com, Cottonwood Electric, TheChapelMotorcycleShop.com.

SKILLS

- JavaScript

React
Redux
TypeScript
GraphQL (Apollo)
RESTful API's
React Testing Library
Webpack
Astro
Next.js
Node.js

- CSS

Styled Components
PostCSS
LESS
SASS
CSS Modules

- Semantic HTML

- Git & CLI chops
- Troubleshooting
- Responsive Web Design
- Wireframing & Prototyping
- Cross-browser compatibility
- Communication & Liaison
- Web Accessibility
- Mentoring & Advising

EDUCATION

University of Utah

Class of 2014

BS, Mass Communication

Salt Lake Community College

Class of 2012

BS, General Studies
