SUMMARY

I'm a software engineer with 10+ years of experience building polished interfaces for web and native apps. I believe good products come from sweating the small stuff, both in code and in design. While I can work across the whole stack with React Native, React, GraphQL, Node.js and Postgres, building UI is what I enjoy most. I usually get pulled into high-profile projects to get them refined and shipped on time.

EXPERIENCE

Varo Bank

January 2020 - Present

> **Staff Software Engineer**
>
> March 2024 - Present
>
> - Lead engineer on several new Lending products; shipping features from Figma to production.
> - ~70% frontend (React Native/Expo, React web); the rest on GraphQL/Node.js and our Kotlin/Postgres backend.
> - The go-to engineer for the Design System; regularly pulled into discussions on its changes and improvements.
> - Set AI tooling standards (AGENTS.md templates, prompts/evals, agentic workflows) and drove adoption.
> - Integrated third-party services such as Statsig (feature flags and experiments) and Column Tax (tax prep).
> - Mentor and onboard engineers; hosted React workshops to help our iOS and Android engineers ramp up.
> - **Technologies**: TypeScript, React Native (Expo), React (web), React Testing Library, GraphQL, Node.js (Fastify), Kotlin, PostgreSQL.
>
> **Senior Software Engineer, Frontend**
>
> January 2020 - March 2024
>
> - Built banking products start to finish across client banking, growth, engagement and internal tools.
> - Helped develop and launch the new bank.varomoney.com, and led the web efforts to promote server-driven UI (SDUI).
> - Collaborated on the complete Varo Bank app rewrite, moving from native Swift and Android apps to React Native (Expo).
> - Led a team of 3-4 engineers on the React Native rewrite of the Settings page and its related sub-pages.
> - One of the lead engineers on Design System 3.0, a React Native (Expo) system for iOS, Android and web (40+ components).
> - Before that, led web engineering on Design System 2.0: Figma to tokens, accessible components and Storybook.
> - Improved web accessibility: color contrast, focus and hover states, and a "Skip to content" link for keyboard users.
> - Part of the hiring committee: interviewed candidates, and helped mentor and onboard new engineers.
> - **Technologies**: TypeScript, React, Storybook, GraphQL/Apollo, React Testing Library.

Overstock.com

October 2014 - September 2018 & October - December 2019

> **Sr. Frontend Developer**
>
> October 2019 - December 2019
>
> - Returned for a brief second stint, improved and maintained the Product Details Page.
>
> **Frontend Developer, promoted to Sr. Frontend Developer**
>
> October 2014 - September 2018
>
> - Shipped features and A/B tests on product pages and a full-stack mobile web app.
> - Worked closely with UX and Product to shape the design of the features we built and tested.
> - Created reusable React components and NPM modules used by teams across Overstock.com.
> - Built frontend workflow tooling for our repo, including ES6 and ReactJS support.

Sr. Full-Stack Developer @ tZERO (Medici Ventures, Overstock)

September 2018 - October 2019

- Designed and engineered (0-1) the UX for an innovative Web3 product built on blockchain technology.
- Served as acting Dev Lead: hired, mentored and guided the junior developers on the team.
- Contributed to backend systems in Node.js, Express and PostgreSQL alongside the frontend work.

SIDE PROJECTS

RackLab – racklab.tech

- Rack planning design tool for AV and IT pros with multi-rack drag-and-drop builder with real-time power and cooling calculations.
- **Built with**: Next.js, TypeScript, Tailwind CSS, shadcn/ui, Supabase (Postgres), Stripe, Vercel AI SDK on desktop. Expo, React Native, TypeScript, NativeWind, Reanimated on mobile.

Flashkards – flashkards.app

- Offline-first flashcard app with no account needed: import/export decks from Google Sheets or CSV, on-device SQLite storage, no ads or analytics.
- **Built with**: Expo, React Native, TypeScript, Reanimated, expo-sqlite, Zod, Astro (website).

SKILLS

JavaScript | React | React Native | Jotai | TypeScript | GraphQL (Apollo) | React Testing Library | Astro | Expo | Reanimated | Next.js | Node.js | Bun | **CSS** | Figma (design to code) | Design Systems | Design Tokens | Shadcn/ui | Tailwind CSS (🔥) | SASS | CSS Modules | Responsive Design | Storybook | **Semantic HTML** | Wireframing & Prototyping | Accessibility | Mentoring & Advising | Leadership

EDUCATION

University of Utah

Class of 2014
BS, Strategic Communication
