SUMMARY

Product Software Engineer with a 10+ years of expertise in creating high-quality, high-performance web and native products. Passionate about blending technical know-how with intuitive design to create a great UX. Skilled in modern technologies like React, React Native, TypeScript, Node.js and GraphQL, with a strong track record in leading projects, shipping consistently and mentoring teams.

EXPERIENCE

Varo Bank

January 2020 - Present

Staff Software Engineer

March 2024 - Present

- Currently driving Lending features and optimizations toward profitability (Fixer archetype).
- Splitting time ~70/30 between React Native/Expo + React web and the GraphQL/Node.js middle-layer.
- Established AI tooling standards (AGENTS.md templates, prompt/eval practices, agentic workflows) and drove adoption across teams.
- Integrated 3rd party services such as Statsig (feature and experiment platform) and Column Tax (tax prep).
- Continue to mentor and onboard engineers; hosted React workshops for Native Engineers.
- **Some technologies I am working with:** TypeScript, React (web), React Native (Expo), GraphQL, Node.js (Fastify), PostgreSQL, React Testing Library.

Senior Software Engineer, Web

January 2020 - March 2024

- Led the Web Engineering effort on Design System 2.0 and helped drive the migration.
- Helped develop and launch the new bank.varomoney.com.
- Collaborated on the complete Varo Bank app rewrite in React Native (Expo) + TypeScript.
- Led a team of 3-4 engineers on the React Native rewrite of the settings page and related sub-pages.
- Worked across multiple projects and teams: client banking, growth, engagement, internal tools, and design systems.
- Part of a hiring committee; helped mentor and onboard new engineers.
- **Some technologies I worked with:** TypeScript, React, GraphQL/Apollo, Storybook, React Testing Library.

Sr. Frontend Developer @ Overstock.com

October 2019 - December 2019

- Brief second stint at Overstock.
- Focused on improving and maintaining the Product Details Page through feature development and bug fixes.
- **Some technologies I worked with:** Node.js, Express, Webpack, Redux and React.

Sr. Full-Stack Developer @ tZERO

September 2018 - October 2019

- Designed and engineered (0-1) the UX for an innovative Web3 product built on blockchain technology.
- Focused on the front-end (React, Redux) while contributing to back-end systems in Node.js, Express, and PostgreSQL.
- Served as acting Dev Lead - hiring, mentoring, and guiding junior developers to improve code quality and velocity.
- **Some technologies I worked with:** React, Redux, Node.js, Express, PostgreSQL, Jest and Webpack.

Frontend Developer @ Overstock.com

October 2014 - September 2018

- Handled new feature implementation, A/B Tests, and bug squishing on product pages.
- Worked on a full-stack mobile web app as well as various client-side apps.
- Was involved in the design process of product with UX and Product teammates.
- Built tools for our front-end workflow, such as implementing ES6 support and ReactJS into our repo.
- Created reusable React components and NPM modules that were used by teams across Overstock.com.
- During this time I was promoted to Senior Frontend Developer. Some previous teams I worked with: Marketing and Production web team.
- **Some technologies I worked with:** jQuery, Node.js, Express, Webpack, Redux and React.

SKILLS

JavaScript React React Native Redux TypeScript GraphQL (Apollo) REST APIs React Testing Library Astro Expo Next.js
