SUMMARY

Product Software Engineer with a 10+ years of expertise in creating high-quality, high-performance web and native products. Passionate about blending technical know-how with intuitive design to create a great UX. Skilled in modern technologies like React, React Native, TypeScript, Node.js and GraphQL, with a strong track record in leading projects, shipping consistently and mentoring teams.

EXPERIENCE

Varo Bank

January 2020 - Present

Staff Software Engineer

March 2024 - Present

- Currently driving Lending features and optimizations toward profitability (Fixer archetype).
- Splitting time ~70/30 between React Native/Expo + React web and the GraphQL/Node.js middle-layer.
- Established AI tooling standards (AGENTS.md templates, prompt/eval practices, agentic workflows) and drove adoption across teams.
- Integrated 3rd party services such as Statsig (feature and experiment platform) and Column Tax (tax prep).
- Continue to mentor and onboard engineers; hosted React workshops for Native Engineers.
- **Some technologies I am working with:** TypeScript, React (web), React Native (Expo), GraphQL, Node.js (Fastify), PostgreSQL, React Testing Library.

Senior Software Engineer, Web

January 2020 - March 2024

- Led the Web Engineering effort on Design System 2.0 and helped drive the migration.
- Helped develop and launch the new bank.varomoney.com.
- Collaborated on the complete Varo Bank app rewrite in React Native (Expo) + TypeScript.
- Led a team of 3-4 engineers on the React Native rewrite of the settings page and related sub-pages.
- Worked across multiple projects and teams: client banking, growth, engagement, internal tools, and design systems.
- Part of a hiring committee; helped mentor and onboard new engineers.
- **Some technologies I worked with:** TypeScript, React, GraphQL/Apollo, Storybook, React Testing Library.

Overstock.com

October 2014 - September 2018 & October - December 2019

Sr. Frontend Developer

October 2019 - December 2019

- Returned for a second stint to improve and maintain the Product Details Page through feature development and bug fixes.

Frontend Developer, promoted to Sr. Frontend Developer

October 2014 - September 2018

- Created reusable React components and NPM modules used by teams across Overstock.com, and built front-end workflow tooling such as ES6 and ReactJS support in our repo.
- Shipped features and A/B tests on product pages and a full-stack mobile web app, collaborating with UX and Product on the design of what we built.

Sr. Full-Stack Developer @ tZERO

September 2018 - October 2019

- Designed and engineered (0-1) the UX for an innovative Web3 product built on blockchain technology.
- Served as acting Dev Lead – hiring, mentoring, and guiding junior developers – while contributing to back-end systems in Node.js, Express, and PostgreSQL.

SIDE PROJECTS

RackLab – racklab.tech

- Rack design and planning tool for AV and IT pros: multi-rack projects, drag-and-drop builder with undo/redo, AI-assisted equipment lookup, and subscription billing. **Built with:** Next.js, TypeScript, Tailwind CSS, shadcn/ui, Supabase (Postgres), Stripe, Vercel AI SDK.
- Currently building the companion mobile app on the same Supabase backend. **Built with:** Expo, React Native, TypeScript, NativeWind, Reanimated.

Flashkards

- Offline-first flashcard app for iOS and Android: gesture-driven study flow with haptics, local SQLite storage, and over-the-air releases via EAS Update. **Built with:** Expo, React Native, TypeScript, Reanimated, expo-sqlite, Zod.
